Subject index

Key: A = abstract; b = book review; c = corresponcence; r = review; w = workshop report

A-cell, pancreatic - ion flux 587 A
Acetoacetate [see Ketone body]
Acetylsalicylic acid [see Salicylate]
Acomys cahirinus - insulin release 575 A
Acromegaly - glucose turnover 778
ADH [see Vasopressin]
Adipocyte [see also Lipolysis]
- glucose transport - insulin action, assay of 287
- - growth hormone fragment, effect of 882
- - measurement 287
- - theophylline 542 A
- lactate, effect of 607 A
- metabolism - fatty acid concentration, effect of 546 A
- metformin, effect of 798
- phosphatidyl inositol turnover 599 A
Adipose tissue - cold adaptation - glucose utilization 542 A
- GIP, effect of 68
- glucose transport - catecholamine, effect of 371
- - insulin, effect of 371
- hamster 371
- needle biopsy 287
Adrenaline [see also Catecholamine]
- glucose homeostasis 409
- protein anabolism, effect on 526 A
Age - old - diabetes - prevalence
Albumin - escape rate, capillary - diabetes 282
- glycosylation, effect of 517 A
Aldose reductase inhibitor - ICI 128436 584 A
- - diabetic rat - retina 597 A
- - erythrocyte viscosity 586 A
- nerve, effect on - myo-inositol 168
- - sorbitol 168
- polyol pathway 550 A
- Sorbinil 168
- Tolrestat - neuropathy, diabetic 521 A
Amino-acid - branched-chain - oxidation - regulation 535 A
- metabolic interactions with glucose 536 A
Announcements 266
Anolis carolinensis 321
Antibody - albumin - diabetes 481
- albumin - diabetes 537 A 897
- anti-idiotypic - pancreatic - spontaneous human 573 A
- auto- - monoclonal - human hybridoma culture 580 A
- insulin [see also Insulin - immunogenicity]
- - ^{123}I-insulin metabolism 595 A
- - effects - normal rat 539 A
- - IgG subclasses - ELISA 720
- - insulin receptor, effect on 447
- insulin auto- - diabetes, Type 1 583 A
- - - familial occurrence 339
- - - prognostic value 526 A
- - idiotype polymorphism 607 A
- - prediabetes Type 1 752 c, 753 c
- - Type 1 diabetes - implications 532 A
- - viral infections 533 A
- islet-cell - animal model 605 A
- - assay - flowcytometry 562 A
- - - human proinsulin antibody 115
- - - immunofluorescence - two-colour 562 A
- - - peroxidase-protein A 378
- - - RINm5F cell - normal sera cytotoxic 611
- - - two-colour IFT 115
- - B-cell, pancreatic, effect on 607 A
- - BB rat - insulin-blockable 553 A
- - complement-fixing - B-cell function 581 A
- - diabetes - B-cell function 585 A
- - diabetes, Type 1 378
- - monoclonal 533 A
- - mumps 30, 406 c, 407 c, 603 A
- - standardization - international workshop 125 w
- - surface - assay - microwell 569 A
- - - monoclonal - BB rat 330
- - - rat monoclonal 522 A
- - - virus-induced 524 A
- - viral infections 533 A
- - western blot analysis 520 A
- organ-specific - diabetes, Type 1 591 A
- splenocyte - diabetes, Type 1 593 A
Anticonvulsant therapy - insulin secretion, effect on 34
Aorta - diabetes - rat 513 A
Apoprotein - HDL - glycosylated - diabetes 524 A
Aprotinin - SC injection 204 c
Artery [see also Macrovascular disease]
- calcification - diabetes 569 A
- diabetes - aminoguanidine, effect of 523 A
- metabolism - coronary disease 535 A
Asialo-orosomucoid - clearance - diabetes, streptozotocin 383
Aspirin [see Salicylate]
Atherosclerosis [see Macrovascular disease]
ATPase - Na^+/K^+ - erythrocyte - diabetes 623
Atrial natriuretic peptide - diabetes, Type 1, effects in 544 A
Autoimmunity - polyendocrine - diabetes, Type 1 - HLA-DR 547 A

B-cell, pancreatic [see also RINm5F cell]
- betagranin - molecular cloning 551 A
- calcium content - amino-acid, effect of 608 A
- cyclosporin A toxicity 489
- diabetes, Type 2 - enkephalin, effect of 541 A
- function - assessment [see also Glucagon - test]
- gap junction - role 570 A
- hamster, SV40-transformed (HIT cell) 727
- HLA expression - Class II 585 A
- ion flux - tracer method 514 A
- lysosome - enzymes - insulin secretion and 595 A
- - morphology - transplanted islets 592 A
- permeabilised - free Ca^+ 576 A
- pH 513 A
- protein kinase 522 A
- toxic agent - chlorozotocin 186
- streptozotocin [see also Streptozotocin]
- tumour - transgenic - protein expression 514 A
Baboon - diabetes - kidney 734
BB rat - autoantibody - pancreatic - monoclonal 529 A
- cyclosporin A 520 A
- diabetes - B-cell, pancreatic - MHC Class II expression 749
- - immunomodulation 557 A
- - interferon-gamma 749
- - non-lymphopenic - genetics 544 A
- - passive transfer 608 A
- - $RT6^+$ lymphocytes 574 A
- - thymectomy 565 A
- insulin release - longitudinal study 802
- islet lesion 559 A
- - mechanism 585 A
- islet-cell surface Ab - monoclonal 330
- MHC - RFLP 307
- pancreas - vascular permeability 567 A
- T-lymphocyte - mechanism 542 A
- thymus - MHC Class II expression 584 A
Beckwith-Wiedemann syndrome 468 c
Beta-adrenergic blocking agent - glucose homeostasis 409
- hypoglycaemia, effect on 528 A
Beta-adrenoceptor - streptozotocin, effect on 741
Beta-hydroxy butyrate [see Ketone body]
Biguanide - metformin - action - insulin receptor 798
- - - hepatocyte 585 A
- - - action 552 A
- - - platelet 607 A
- - - vascular cell 523 A
Blood - coagulation [see also Protein S]
- - diabetes 512 A
- - - fibrin polymerisation 567 A
- erythrocyte [see also Erythrocyte]
- flow - diabetes 575 A
- - skin - aprotinin, effect of 204 c
- - - diabetes, Type 1 571 A
- pressure [see also Hypertension]
- - diabetes - mechanism 527 A
- - diabetes, Type 1 275
- - - childhood 640
- - - families 534 A
- - glomerular filtration - diabetes 211
- - heredity - diabetes, Type 1 275
- red cell [see also Erythrocyte]
- viscosity - apolipoprotein B and 581 A
Bone - mass - diabetes 568 A
Brain - blood-brain barrier - diabetes 58
- - glucose transport - diabetes 569 A
- diabetes - prostanoid synthesis 571 A
- insulin receptor - lizard 321
- lactate - metabolic fuel 577 A
Brainstem - auditory evoked potentials - diabetes 362
- visual evoked potentials - diabetes 362
Brown fat [see Adipose]

C-peptide - diabetes, Type 1 - HLA 347
- kinetics 602A
- secretion kinetics - dog 440
Capillary - albumin escape rate - diabetes 282
- permeability - diabetes 516A
Captopril - renal function, effect on - diabetes 607A
Catecholamine - cholesterol metabolism, effect on 122
- kinetics - diabetes 773
- neonatal rat - exsanguination, effect of 388
- sensitivity - diabetes 517A
Cell - insulin-secreting [see B-cell, pancreatic; Insulinoma; RINm5F cell]
- - HIT-T15 727
Chinese hamster - B-cell, pancreatic - elementary composition 555A
Chlorozotocin - B-cell, pancreatic, toxicity to - mechanism 186
Cholecystokinin - insulinotropic action 513A
Cholesterol - biosynthesis - diabetes, Type 2 513A
- metabolism - catecholamine, effect of 122
- - insulin, effect of 122
Claude Bernard Lecture, 18th 837r
Coeliac disease - diabetes, Type 1 567A
Collagen - diabetes - islet transplantation 392
- Type IV - diabetes - hypertension 547A
Colour vision - diabetes, impaired in - Sulindac, effect of 574A
Compartmental model - leucine, bicarbonate 131
Contraception - diabetes 561A
Corticosteroid - glucose metabolism, effect on - deflazacort 566A
- insulin release, effect on 119
Crystallin - glycosylation 225
Curve-fitting - least-squares error optimization algorithm 131
Cyclosporin A [see also Diabetes - Type 1; Transplantation]
- B-cell, pancreatic - 535A, 538A
- - toxicity - reversible 489
- insulitis - NOD mouse 574A
- islet, effect on 597A
- mouse, non-obese diabetic (NOD) 244
Cystic fibrosis - proinsulin response 539A

D-glucose [see Glucose]
Dawn phenomenon [see also Somatostatin]
- mechanism 475, 522A, 532A
- somatostatin analogue SMS 201-995, effect of 557A, 590A
Diabetes - animal model - EMC virus 313
- Annual, The 69b
- classification - clinical - glucagon stimulation test 534A
- immune function - neutrophil leucocyte 426
- lipoatrophic - insulin resistance, mechanism 587A
- Macaca nigra 301
- streptozotocin-induced - suppression 555A
- - urea synthesis 812
- tropical malnutrition 127c, 128c
- Type 1 - aetiology - stress 604A
- - antibody-dependent cell-mediated cytotoxicity 559A, 589A
- - cell-mediated cytotoxicity - B-cell, pancreatic 421
- - cell-mediated immunity 562A, 609A
- - - islet cytotoxicity 352
- - - lymphocyte transfusion 566A
- - - NK cell 352
- - - - interferon 526A
- - genetics - DQ-beta gene polymorphism 549A
- - - glucose tolerance in siblings 39
- - - Gm haplotypes - HLA interaction 550A
- - - heterogeneity 207, 347, 521A
- - - HLA 39, 430, 823c
- - - - Asian 537A
- - - polygenic inheritance 203c, 204c
- - - unaffected twins - B-cell function 564A
- - heterogeneity 823c
- - immune genotype 571A
- - immunotherapy 572A
- - - cyclosporin A 536A, 565A
- - insulin autoantibodies 339
- - insulitis 267
- - islet-cell antibody 30
- - lymphocyte - natural killer 551A
- - mumps 30
- - - autoimmunity 673c
- - natural course 591A
- - pancreas - histopathology 267
- - pathogenesis - interleukin-1 63
- - remission - HLA-DR 2 593A
- - - insulin antibodies and 578A
- - - lymphocytes - theophylline sensitivity 531A
- - survival, long-term - familial? 576A
- - T-cell - clones - HLA Class II restriction 572A
- - - identical twins 554A
- - - islet-specific 541A
- - treatment - combined therapy 555A
- Type 2 - animal model - Macaca mulatta 713
- - - spontaneously hypertensive rat 808
- - - streptozotocin in rat 295
- - early-onset 577A
- - familial - mechanism 602A
- - genetics - HLA 757
- - - insulin-gene RFLP - Japan 402
- - heterogeneity - prediabetes, Type 1 757
- - incretin effect 46
- - insulin resistance - NEFA vs glucose metabolism 524A
- - islet histopathology 528A
- - obesity - past and present 82
- - obesity and 407c, 408c
- - - erratum 754
- - prediabetes, Type 1 603A
- - treatment - combined therapy 552A
- - - insulin - intensive 541A
- - - - prediction 583A
- - - - vs sulphonamides 537A
DIDMOAD syndrome 588A
Diet - diabetes - beer 596A
- - fat - polyunsaturated 547A
- - fatty acids - platelets, effect on 582A
- - glycaemic effects of different foods 358
- - mixed meals - glucose turnover 100
- - sucrose 216
- - sugars - glycaemic index 784
- - sweeteners 529A
- diabetes, Type 2 577A
- - guar - pasta 541A
- - lipoproteins, effect on 586A
- education - diabetes, Type 2 205c
- high-fat - insulin resistance 192
- starch - processing method 521A

EASD - General Assembly 507
- Organization section 70, 130, 206, 346, 470, 505, 676
Education - diabetes - evaluation 519A
- - group 548A
- - medical consultation 538A
- - mountain courses 549A
- diet - diabetes, Type 2 205c
Electroretinogram - diabetes - metabolic control and 527A
Embryogenesis - diabetes - proteoglycans, role of 534A
- hypoglycaemia, effect of - rat 512A
- sorbitol 522A
EMC (encephalomyocarditis) virus 313
Endocrine cell, pancreatic [see Islet cell]
Endocrinology - metabolism, and 69b
Endorphin, beta- - glucose homeostasis, effect on 580A
Endothelial cell - cultured - glucose, effect of 583A
- DNA - hyperglycaemia, effect of 566A
Endothelium [see also Fibronectin]
- diabetes, early - functional changes 596A
- inositol content 578A
Enprostil - carbohydrate homeostasis, effect on 575A
Epidemiology - carbohydrate homeostasis abnormalities - Fiji 588A
- diabetes - Athens 533A
- diabetes, Type 1 - incidence trends 570A
- - mortality, relative 767
- - seasonal variation 629
- - urban-rural variation 629
- diabetes, Type 2 78
- - Asian vs European origin 235
- - Finland - elderly men 611
- obesity 78
Epinephrine [see Adrenaline; Catecholamine]
Erythrocyte - adhesion - diabetes - metabolic control 151
- - measurement - endothelium, cultured 151
- deformability - ob/ob mouse, diabetic 661
- diabetes - ATPase, Na^+/K^+ 623
- fatty acid composition - diabetes 690
- magnesium - insulin, effect of 644
- membrane - diabetes - insulin, effect of 417
- - fluidity 417
ETOMOXIR - use in man 519A
- action 560A
Exercise - diabetes - renal function - noradrenaline 554A
- diabetes, Type 1 - adjustment of treatment 589A
- glycaemic control 53
- lipoprotein, serum 53
- muscle, effect on - protein turnover - obesity 248

Fat [see Adipocyte; Adipose tissue; Diet]
Fatty acid - albumin binding - glycosylation, effect of 366
- composition - erythrocyte - diabetes 690
- - lipoprotein, serum - diabetes 690
- non-esterified - metabolism - diabetes, Type 2 543 A
- prostaglandin precursor - diabetic vascular disease 565 A
Ferrocene - glucose sensor 817
Fetus - hyperglycaemia - insulin release - rat 434
- hyperglycaemic hyperinsulinaemic - glucose turnover - rat 564 A
- hyperinsulinaemic - Beckwith-Wiedemann syndrome 468 c
FFA [see Fatty acid - non-esterified]
Fibronectin - plasma - microalbuminuria and 532 A
Fluorescein - pharmacokinetics - rat - diabetes, effect of 175
- protein binding 175
Foot - dynamic pressure distribution 557 A
- - measurement 590 A
Free fatty acid [see Fatty acid - non-esterified]
Fructosamine, serum - assay - automated 580 A, 581
Fructose - diet - effects - rat 516 A
Frusemide - diabetogenic effect 589 A
Furosemide [see Frusemide]

Galanin - action - endocrine pancreas 594 A
Ganglion - dorsal root - diabetes - metabolic changes 876
Gastric inhibitory peptide [see GIP]
Gastrin-releasing peptide - insulin secretion, effect on 582 A
Gene - insulin [see Insulin - gene]
- insulin receptor 667
Genetics [see Insulin; Insulin - receptor; HLA; Diabetes]
GIP (glucose-stimulated insulinotropic peptide; gastric inhibitory peptide)
- action - liver - glycogenolysis 112
- adipose tissue, effect on 68
- diabetes 554 A
- fragments - insulinotropic activity 591 A
- release - ob/ob mouse 561 A
Glicentin [see also Oxyntomodulin]
- glucagon secretion, effect on 397
- plasma - uraemia - pig 462
Glucagon [see also Glicentin; Islet - hormone]
- action - alloxan-diabetic dog 565 A
- diabetes - glycaemic control and 556 A
- immunoreactivity 462
- neonatal rat - exsanguination, effect of 388
- secretion - adenosine-induced - adrenaline 543 A
- - glicentin, effect of 397
- - regulation - autonomic 827 r
- - sulphonylurea, direct inhibition by 861
- - sympathetic nerve stimulation 512 A
- test - reproducibility 560 A
Gluconeogenesis - quantitative assessment 529 A
Glucose - ^{13}C-labelled - positional isotopic analysis 586 A
- appearance 100
- blood - home monitoring - evaluation 530 A, 606 A
- - - colour vision and 590 A
- D-glucose - sweetness - anomeric specificity 344 c
- disposal - concentration, effect of - diabetes, Type 1 595 A
- - hyperglycaemia - man 608 A
- - triglyceride infusion study 536 A
- hepatic production - diabetes, Type 1 - insulin sensitivity 550 A
- metabolic clearance rate 100
- oral load - distribution in normal man 556 A
- oxidation - diabetes and starvation 557 A
- sensor - amperometric 570 A
- - SC implantation 817
- tolerance - impaired - rate of deterioration 558 A
- - insulin response - Asian vs European subjects 235
- - IV - computer analysis 609 A
- turnover - exercise - insulin deficiency, effect of 519 A
Glucose-stimulated insulinotropic peptide [see GIP]
Glycaemic effect - measurement - insulinaemia, importance of 358
Glycaemic index 784
Glycogen - synthesis - diabetes, Type 1 699
- - gluconeogenic precursors - NMR quantitation 593 A
Glycoprotein - asialo-orosomucoid 383
Glycosylation (non-enzymatic)
- albumin - assay 366
- - diabetes 634
- - fatty-acid binding, effect on 366
- cell-membrane 605 A
- haemoglobin [see also HbA_1; Haemoglobin - glycosylation]
- insulin 563 A
- LDL 552 A, 685
- lens, crystalline - diabetes 225
- lipoprotein - catabolism 602 A
- protein - inhibitors 531 A
- serum protein - assay - glycated lysine 590 A
Glypentide [see Sulphonylurea]
Growth - factor - insulin-like [see IGF]
- - platelet-derived 544 A
- - vascular - atherogenesis and 560 A
- hormone [see also Somatomedin; IGF-1]
- - action 601 A
- - diabetes, Type 1, responses in 540 A
- - diabetogenic effect 778
- - fragment - hGH 4–15 - glucose transport 882
- - insulin secretion, effect on 576 A
- - islet, effect on - fetal rat 598 A
- - receptor - diabetes 106
Gut [see also Intestine]
- hormones - insulinoma, effect of 334

Haematuria - proteinuria - diabetes, Type 1 525 A
Haemoglobin - glycosylation [see HbA_1; Glycosylation - haemoglobin]
Haemorrhage - glucoregulatory hormones, effect on - neonatal rat 388
HbA_1 - assay - HPLC 598 A
- - filter paper samples 582 A

Vascular compliance - diabetes 516A
Vascular permeability - diabetes - islet transplantation 392
Vasopressin - plasma - ketoacidosis 405c
Virus - encephalomyocarditis - diabetes - host factors 313
Vitamin - D - deficiency - islet hormone secretion 34
- - insulin secretion 142
- - glucagon secretion 142
- - islet function 468c, 469c
- E - evening primrose oil - diabetes, Type 1 603A
Vitreous - fluorophotometry - rat 175

Wheat germ agglutinin - lectin histochemistry 495
Wolfram syndrome 588A

Springer International

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders. All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of going to press, neither the authors nor the editors nor the publisher can accept legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US$ 0.20 per page, or a minimum of US$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0012-186X, the volume, and the first and last page numbers of each article copied.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Other regulations: Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and those resident in the Federal Republic of Germany or Berlin (West), as well as citizens of Austria, Switzerland and member countries of the European community may apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.
